

A. Claims Remaining in the Application:

1. (previously amended) A rocking chair slipper for placing over the rocker foot of a rocking chair to protect the floor, comprising:

an elastic strip that is attached all around the edge of the opening of the slipper to enable the slipper to stretch enough to fit over the rocker foot and then conform back to the shape of the rocker foot;

fabric or ribbon strips eight inches in length attached to the opening of the slipper on both sides at two strategic points, one at 8 inches from the front corner and one 6 inches from the back corner of opening, to be tied into a bow around the rocker foot to keep the slipper in place, rigidly connected to an elastic strip that is attached all around the edge of the opening of the slipper to enable the slipper to stretch enough to fit over the rocker foot and then conform back to the shape of the rocker foot;

fabric must stretch all ways to expand to fit and conform to the shape and length of a standard rocking chair rocker foot; and

foam or other padding inserted between two layers of fabric on the bottom of the slipper to cushion the floor and rocker foot, rigidly connected to fabric which must stretch all ways to expand to fit and conform to the shape and length of a standard rocking chair rocker foot

2. (previously amended) The rocking chair slipper in accordance with claim 1, wherein an elastic strip that is attached all around the edge of the opening of the slipper to enable the slipper to stretch enough to fit over the rocker foot and then conform back to the shape of the rocker foot further comprising two pieces of 1/2" wide elastic measuring 20" in length elastic strips.

3. (previously amended) The rocking chair slipper in accordance with claim 1, wherein said fabric or ribbon strips eight inches in length attached to the opening of the slipper on both sides at two strategic points, one at 8 inches from the front corner and one 6 inches from the back corner of opening to be tied into a bow around the rocker foot to keep the slipper in place further comprising two eight inch lengths of ribbon or similar material fabric ties.

4. (previously amended) The rocking chair slipper in accordance with claim 1, wherein said fabric must stretch all ways to expand to fit and conform to the shape and length of a standard rocking chair rocker foot comprises a four way stretch fabric 36" in length and 12" inches wide that is folded in half and sewn in such a manner to form a slipper of stretch fabric.

5. (previously amended) The rocking chair slipper in accordance with claim 1, wherein said foam or other padding inserted between two layers of fabric on the bottom of the slipper to cushion the floor and rocker foot further comprising a foam or other padding 1/2" thick by 2" wide by 30" long padding.

6. (previously amended) A rocking chair slipper for placing over the rocker foot of a rocking chair to protect the floor comprising:

two pieces of 1/2" wide elastic measuring 20" in length elastic strips, or an elastic strip that is attached all around the edge of the opening of the slipper to enable the slipper to stretch enough to fit over the rocker foot and then conform back to the shape of the rocker foot;

two eight inch lengths of ribbon or similar material fabric ties or fabric or ribbon strips eight inches in length attached to the opening of the slipper on both sides at two strategic points one at 8 inches from the front corner and one 6 inches from the back corner of opening to be tied into a bow around the rocker foot to keep the slipper in place, rigidly connected to said elastic strips;

a four way stretch fabric 36" in length and by 12" wide that is folded in half and sewn in such a manner to form a slipper of stretch fabric, for fabric must stretch all ways to expand to fit and conform to the shape and length of a standard rocking chair rocker foot; and

foam or other padding 1/2" thick by 2" wide by 30" long padding, or foam or other padding inserted between two layers of fabric on the bottom of the slipper to cushion the floor and rocker foot, rigidly connected to said stretch fabric.

7. (previously amended) The rocking chair slipper as recited in claim 6, further comprising:

any decorative gathered trim such as lace or other decorative trim, attached to the opening of the slipper for decorative purposes, rigidly connected to said fabric ties, and rigidly connected to said stretch fabric.

8. (previously amended) The rocking chair slipper as recited in claim 6, further comprising:

ribbon or similar fabric tied into a bow and sewn on to the front of the slipper for decorative purposes only.

9. (previously amended) The rocking chair slipper as recited in claim 7, further comprising:

a ribbon or similar fabric tied into a bow and sewn on to the front of the slipper for decorative purposes only.

10. (previously amended) A rocking chair slipper for placing over the rocker foot of a rocking chair to protect the floor comprising:

two pieces of 1/2" wide elastic measuring 20" in length that is attached all around the edge of the opening of the slipper to enable the slipper to stretch enough to fit over the rocker foot and then conform back to the shape of the rocker foot;

a decorative gathered trim such as lace or other decorative trim, attached to the opening of the slipper for decorative purposes;

two eight inch lengths of ribbon or similar material fabric ties, or fabric or ribbon strips eight inches in length attached to the opening of the slipper on both sides at two strategic points, one at 8 inches from the front corner and one 6 inches from the back corner of opening to be tied into a bow around the rocker foot to keep the slipper in place, rigidly connected to said lace or other decorative trim, and rigidly connected to said elastic strips;

a ribbon or similar fabric tied into a bow and sewn on to the front of the slipper for decorative purposes only;

a four way stretch fabric 36" in length and 12" wide that is folded in half and sewn in such a manner to form a slipper of stretch fabric, wherein fabric must stretch all ways to expand to fit and conform to the shape and length of a standard rocking chair rocker foot, rigidly connected to said lace or other decorative trim;

a foam or other padding 1/2" thick by 2" wide by 30" long padding, of foam or other padding inserted between two layers of fabric on the bottom of the slipper to cushion the floor and rocker foot, rigidly connected to said stretch fabric.
